Subject: Dimock samples

Hi Rich, I don't mean to bug you about this but, Cindy Caporale wanted me to check with you and see if you could possible give us an estimate as to when you might be able to send us the methane data, for whatever samples you have completed. What is really needed is to know whether any of the results are greater than the screening level of 28,000 ug/L. If that is something you could send as soon as you know it, that would be helpful.
But, if this doesn't make sense, just let me know. thanks!
robin
